**Uveitis** Nicholas P Jones, 2012-12-18 Uveitis is a complex condition with a variety of causes and clinical manifestations. Certain types are extremely serious and can cause severe ocular morbidity if undetected and untreated. Even experienced ophthalmologists find it a difficult and frustrating condition, with the result that it is often misdiagnosed and mistreated. The wide array of diseases that can affect the uveal tract and the impact of immunological research - with resulting discovery of new uveitis entities - mean that clinicians managing patients with uveitis require a broad knowledge not only of relevant ophthalmology, but also immunology and general medicine. This book is designed to provide trainee and practising ophthalmologists with a user-friendly, up-to-date review of today's body of knowledge about this difficult condition, and a practical guide to its diagnosis and management. From the foreword to the first edition, written by Jack Kanski: "(This book) presents a complex subject in a logical, systematic and easily digestible manner. I have learned much from reading it myself and some of my rather hazy ideas on the subject have been crystallised. Above all, the book contains lots of common sense. It is an excellent resumé of current knowledge which, I am sure, will be extremely useful to consultants, ophthalmologists in training, physicians, and all who deal with uveitis." Key Points Extensively revised and updated to include latest management protocols and references High proportion of clinical photographs new to this edition, drawn from author's personal collection

and reproduced to highest quality Uveitis 2/e reflects unique experience of the author Nicholas Jones, a superb, world renowned clinician and inspiring teacher who created the Uveitis Clinic at the REH in Manchester, serving the Northwest of England and treating thousands of patients.

Uveitis Nicholas P. Jones, 1998 A comprehensive text on the diagnosis and management of uveitis and other inflammatory diseases of the eye ball. It presents practical advice on the direct management of patients for a range of inflammatory conditions and their complications.

Risk Assessment and Management Lester B. Lave, 2013-06-29 This is a collection of papers presented at the 1985 annual meeting of the Society for Risk Analysis. As always seems to occur at these meetings, the discussion was lively, the sessions were filled, and people complained about not being able to hear all the papers they wanted to because of concurrent sessions. If ever someone is in charge of a meeting, I wish them the good luck to have it be one for the Society for Risk Analysis. While I was responsible for the meeting, it could not have taken place without the efforts of the general chairman, Alan Moshissi. The program committee was chaired by Janice Longstreth, and included Lee Abramson and Vincent Covello. Together we assembled disparate papers into reasonably coherent sessions, prodded authors into getting us manuscripts on time, and dealt with all the last minute changes that are required for a major meeting. The Washington chapter of the Society for Risk Analysis hosted the meeting. Dr. Longstreth was president of the chapter during this fateful year and deserves a great deal of thanks for her organizational skills and efforts. Rick Cothorn, Jerry Chandler, Kathleen Knox, Sue Perlin, and Paul Price played major roles in organizing the meeting and making it run smoothly. Special thanks go to Richard J. Burk, Jr., Executive Secretary of the Society, and his staff for handling the logistics.

**Prion Diseases** John Collinge (MD.), Mark S. Palmer, 1997 The number of neurological conditions associated with the mutant prion protein continues to grow. The list includes BSE and scrapie, which affect cattle and sheep respectively, and Creutzfeldt-Jacob Disease, which affects humans. This is an area of intense interest to neuroscientists, veterinary scientists, and clinicians. It has also attracted significant media attention because of the potential risks to humans. This book brings together leading researchers in the field to provide the most up-to-date and authoritative summary available of the field. Contents include human and animal prion diseases; pathology and cell biology of prion diseases; and prion protein structure.
